The City of Newark is hosting a public meeting for the **Newark Riverfront Pedestrian and Bicycle Access Concept Development (CD) Study**. The purpose of this CD Study is to identify safety and mobility improvements on Park Place/Center Street from Broad Street to NJ 21, and on Broad Street from Rector Street to Washington Place, referred to as the Military Park Area, or NJ Performing Arts Center (NJPAC) Area. This project aims to:

- Improve safety and mobility for pedestrians, bicyclists, transit users, motorists, and all road users
- Establish better pedestrian and bicycle connections between Broad Street and Passaic waterfront area
- Expand the active transportation network within the City

The meeting aims to review the proposed conceptual improvements, including the preliminary preferred alternative, and gather feedback from project stakeholders and the public. We invite you to join us and share your thoughts on pedestrian and bicycle safety in downtown Newark!
